CREATE A BRANCH

Create a branch in your project where you can safely experiment and make changes.

ADD COMMITS

OPEN A PULL REQUEST

Use a pull request to get feedback on your changes from people down the hall or ten time zones away.

DISCUSS AND REVIEW

MERGE AND DEPLOY

Merge your changes into your master branch and deploy your code.

The GitHub Flow is a lightweight, branch-based workflow that's great for teams and projects with regular deployments. Find this and other guides at **http://guides.github.com/**.

GitHub is the best way to build software together.

GitHub provides tools for easier collaboration and code sharing from any device. Start collaborating with millions of developers today!
